

Quality Policy Statement

Watercon is proud of its reputation for providing quality products to industry and this policy applies to all of the activities of the company.

Watercon management is totally committed to supplying these products and services to meet quality standards expected by our customers and ensuring complete satisfaction.

Watercon has documented a quality management system that complies with the requirements of ISO 9001:2008. The documented system ensures that all activities associated with the manufacture and delivery of the end product are properly identified, controlled, managed, and effective corrective action introduced should failings become apparent.

Business objectives and targets are established by the Directors and progress is monitored and communicated to staff through meetings and notices.

All employees are to take responsibility for implementing the quality management system within the limits of their work areas and are encouraged to actively contribute to the continuous improvement of the quality management system, procedures and products.
